The request should include the patient's register number and/or the number of years of incarceration (for prisoner subjects), full name at time of participation in the research project, date(s) of research participation, and title of research project or name of drug being studied. An individual who requests notification of a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

A parent or legal guardian who requests notification of a child's or adolescent's record shall designate a family physician or other health professional (other than a family member) or a member of the Addiction Research Center staff to whom the record, if any, will be sent. C. 09-30-0036

System name:

Alcohol, Drug Abuse, and Mental Health Epidemiologic and Biometrics Research Data, HHS/ADAMHA/OA.

Minor alterations have been made to the categories of records in the system as follows:

Categories of records in the system:

The system contains data about the individual as relevant to a particular research study. Examples include, but are not limited to, items about the health/mental health and/or alcohol and/or drug consumption patterns of the individual; demographic data; social security numbers (voluntary); past and present life experiences; personality characteristics; social functioning; utilization of health/mental health alcohol and/or drug abuse services; family history; physiological measures; and characteristics and activities of

health/mental health; alcohol abuse, and/or drug abuse care providers.

Retrievability:

During data collection stages and followup, if any, retrieval by personal identifier (e.g., name, social security number (in some studies), or medical record number) is necessary. During the data analysis stage, data are normally retrieved by the variables of interest (e.g., diagnosis, age, occupation).

d. 09-30-0039

System name:

Drug Abuse Treatment Outcome Prospective Study (TOPS), HHS/ADAMHA/NIDA.

Minor alterations have been made to the categories of records in the system as follows:

System name:

Drug Abuse Treatment Outcome Study (DATOS), HHS/ADAMHA/NIDA

System location:

For records collected between 1979 through 1986: National Institute on Drug Abuse, Division of Clinical Research, 5600 Fishers Lane, Rockville, Maryland 20857.

New Records will be located with an ADAMHA contractor, not yet determined. You may contact above address for name and location after October 1, 1988.

Categories of individuals covered by the system:

Voluntary adult clients of federally funded treatment programs, including Treatment Alternative Street Crime (TASC) Programs of the Department of Justice, who requested to be included in TOPS from 1979 through 1986. New data collected from voluntary adult clients of treatment programs beginning in 1989 and will continue through 1993.

Purpose:

The purpose of the system is to compile information on drug abusers who obtain treatment in Federally funded abuse treatment programs in order to derive information on the treatment environments and abusers behaviors and characteristics subsequent to treatment. Researchers and drug abuse services providers may use the aggregate data to address issues and generate hypotheses to understand better the interactions among the client and community.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To determine if a record exists, write to the system manager at the address above. An individual may learn if a record exists about himself/herself upon written request, with notarized signature. The request should include, if known, name of the researcher, location of the research site, approximate date of data collection, any alias used, and subject identification number.

An individual who requests notification of a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except: (A) In emergency circumstances affecting the health or safety of any individual, (B) for use in another research project, under these same conditions, and with written authorization of the Department, (C) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (D) when required by law; (E) has secured a written statement attesting to the recipient's understanding of, and willingness to, abide by these provisions.

An ADAMHA contractor (to be determined) uses the records in this system to accomplish the research purpose for which the records are collected. In the event of followup studies or continuation studies, because the contract has been terminated for convenience by the Government, we may disclose records in this system to a subsequent ADAMHA contractor. We would require the new contractor to maintain Privacy Act safeguards with respect to such records.
