Everything seems to be in a flux these days. Around every corner, something^e old is crumbling, something new is emerging. Leaders are at once bold and yet timid; followers sometimes inspired but all too often fearful. Just how are we to be salt and light in the chaos of organizational life today? Whether in commercial, church, or public sector organizations, managing through the “landmines of change” seems to be a pre-requisite for daily living. This workshop will explore three themes:

1. What are these Landmines?
2. “Defusing the Landmines” -the essential role of organizational character.

We’ll use a combination of story-telling, conceptual frameworks and lots of dialogue to develop a personal plan for action to chart our own course across the minefield.

"Thinking" is not a cultural value that is high on the priority list of the masses nor the common church-goer. Biblical, doctrinal and relational illiteracy threaten the very life of the church. This Indian proverb provides us with a word picture concerning leadership development. Due to the heavy foliage of the Banyan tree, very little light is able to get beneath the branches. The seeds that fall to the ground under the tree have trouble growing.

Such is the case for many young Christian leaders in Canada. The shadow caused by those above leaves little room for growth. This workshop will speak to the needs of young leaders as well as address the role of mentoring in developing leaders for the next generation in Canada.
