

## PRESENTER BIO

---

**Jeanane M. Ferre, PhD, CCC-A**, received her PhD in audiology from Northwestern University in 1984 and has been on the faculties of Northern Illinois University, Rush University, and Northwestern University. She has published several articles in refereed journals and presented at the local, state, national, and international levels on central auditory processing (CAP) and CAP disorders. Her works include *Processing Power – A Guide to CAPD Assessment and Treatment*, *The M3 Model for Treating Auditory Disorders*, *Behavioral Therapies for CAPDs*, *The ABCs of CAP: Practical Strategies for Enhancing CAP and Related Skills*, *Classroom Management: Collaboration With Families, Teachers, and Other Professionals*, and *Differential Intervention for CAPDs*. Ferre is the co-author of the *Differential Screening Test for Processing*. She is in private practice in the Chicago metropolitan area, providing evaluation and treatment of central auditory processing disorder among children and adults. Ferre is a fellow of the Illinois Speech-Language-Hearing Association, the 1997 recipient of its Clinical Achievement Award, and received Honors of the association in 2007. She is also an ASHA Fellow (2001). Her research interests include effective intervention for CAPDs, screening for processing disorders, and clinical preparation for assessing/managing CAPDs among school-age children.
