FACULTY

Jennifer A. Brush, MA, CCC-SLP, is known for her work in the areas of memory and swallowing interventions for people with dementia. She has served as the principal investigator on applied research grants that have examined issues pertaining to HIV/AIDS dementia, hearing impairment, dining, dysphagia, and the long-term care environment. Brush is the author of *Meal Time Matters*, a training program that builds nursing assistants’ and home caregivers’ skills related to dining, swallowing disorders, and safe feeding assistance. In addition, she is the co-author of *Environment and Communication Assessment Toolkit* and *A Therapy Technique for Improving Memory: Spaced Retrieval*.

- Received royalties from Health Professions Press
- Received financial compensation from ASHA for this presentation

Nonfinancial Disclosures:
- None

Mary L. Casper, MA, CCC-SLP, is currently the corporate rehabilitation consultant for speech-language pathology with HCR ManorCare. During 25 years in the profession, Casper has focused clinically in swallowing disorders in the geriatric population and communication intervention for individuals with dementia. She is well-versed in regulatory, reimbursement, and clinical operations issues in the skilled nursing facility setting. Casper is the coordinator of ASHA’s Special Interest Group 15 (Gerontology) and an affiliate of Special Interest Group 13 (Swallowing and Swallowing Disorders). She represents the Maryland Speech-Language-Hearing Association as the SMAC (State Medicare Administrative Contractors Network) liaison.

Nonfinancial Disclosures:
- Committee coordinator for ASHA Special Interest Group 15 (Gerontology)

Kate Krival, PhD, CCC-SLP, earned her PhD in communication sciences and disorders with a focus in medical speech pathology from the University of Cincinnati in 2007 and has been a practicing SLP since 1985. Today she directs the Swallowing Research Lab at Kent State University and teaches graduate and undergraduate courses in anatomy, neuroscience, dysphagia, and voice. Krival’s research interests focus on sensorimotor function for swallowing and on the challenges of complex clinical decision-making in medical speech-language pathology. Because of her work in several palliative care settings and her experiences as a family member of a patient in palliative care, Krival has a particular interest in promoting the integration of ethical standards and participation outcomes into clinical decision-making at all stages of palliation.
Financial Disclosures:
- Assistant professor at Kent State University
- Received financial compensation from ASHA for this presentation

- None

Kevin Patterson, MD, obtained his MD in 2003 from New York Medical College before completing a residency in adult psychiatry at Western Psychiatric Institute and Clinic of the University of Pittsburgh in 2007. He has since served on the adult psychiatry faculty at the University of Pittsburgh in psychosomatic medicine. A member of the American Association of Hospice and Palliative Medicine and expert in cancer care psychiatry, Patterson sees patients during hospitalization at UPMC Presbyterian and Shadyside and serves outpatients through the Behavioral Medicine Clinical Service at the Hillman Cancer Center. He is also a distinguished clinical educator and lectures statewide on topics related to chronic illness and psychiatry.
