Causes, Assessment, and Treatment of Esophageal Dysphagia

FACULTY

Ashli O’Rourke, MD, is an assistant professor at the Evelyn Trammell Institute for Voice and Swallowing at the Medical University of South Carolina in Charleston. She received her MD from the Medical College of Georgia in 2005 and completed both her general surgery internship and her otolaryngology–head and neck surgery residency at the University of Virginia in Charlottesville. She went on to complete a fellowship in laryngology–voice and swallowing disorders at the Medical College of Georgia. O’Rourke received a bachelor’s and master’s degree in speech-language pathology and audiology from Florida State University. She practiced clinical speech-language pathology for more than 7 years at Emory University Hospitals in the Atlanta area, specializing in dysphagia evaluation and management. O’Rourke has been board certified through the American Board of Otolaryngology since 2012. Her career interests include swallowing disorders (dysphagia), voice disturbances, and airway concerns. She specializes in many in-office procedures including KTP laser treatment of laryngeal lesions, vocal fold injection medialization, laryngeal biopsy, and transnasal esophagoscopy. She also performs modified barium swallow studies and pharyngeal high-resolution manometry to assess oropharyngeal swallowing disorders.

Financial Disclosures

- Received financial compensation from ASHA for this presentation
- Receives manometry equipment and ongoing technical support from and conducts independent research for Covidien (Given Imaging)

Nonfinancial Disclosures

- No nonfinancial relationships to the content of this presentation
