Grand Rounds in Cochlear Implant Candidacy

FACULTY

Amy McConkey Robbins, MS, CCC-SLP, LSLS Cert. AVT, worked with her first cochlear-implanted child in 1983 and has witnessed the changes in technology, legislative policy, and service provision that make cochlear implants available to more children. She has more than 80 publications, including a speech/music curriculum—TuneUps—that received the “Most Valuable Product” award by clinicians. Robbins' work has focused on family-centered early intervention, oral bilingual families, and techniques to enhance executive functioning in deaf children. She is the author of Whirlwinds and Small Voices: Sustaining Commitment to Work With Special-Needs Children, co-written with Clarence McConkey.

Financial Disclosures

- Received financial compensation from ASHA for this presentation
- Owner of Communication Consulting
- Consults for Advanced Bionics, Phonak, and AG
- Receives author royalties from Lippincott, Williams, and Wilkins
