STATEMENT ON EVIDENCE-BASED PRACTICE

It is the position of the American Speech-Language-Hearing Association that audiologists and speech-language pathologists incorporate the principles of evidence-based practice in clinical decision making to provide high-quality clinical care. The term evidence-based practice refers to an approach in which current, high-quality research evidence is integrated with practitioner expertise and client preferences and values into the process of making clinical decisions.

Participants are encouraged to actively seek and critically evaluate the evidence basis for clinical procedures presented in this and other educational programs.

Adopted by the Scientific and Professional Education Board, April 2006

PRESENTER BIO

Swathi Kiran, PhD, CCC-SLP, is a professor in the Department of Speech Language and Hearing Sciences at Boston University. Her research interests focus on three broad lines of research: neurobiology of language recovery, bilingual aphasia, and using technology to facilitate personalized rehabilitation for individuals with brain damage. She has published more than 60 peer reviewed papers and has presented more than 100 presentations at national and international conferences. Kiran’s work has been continually funded by NIH/NIDCD and she has also received funding from the ASHFoundation and Coulter Foundation. She serves as an associate editor for the Journal of Speech, Language, and Hearing Research and on the editorial board for Journal of Neurolinguistics.
