**PRESENTER BIO**

**Martin B. Brodsky, PhD, ScM, CCC-SLP**, is an assistant professor in the Department of Physical Medicine and Rehabilitation at Johns Hopkins University and is a member of the Outcomes After Critical Illness and Surgery (OACIS) Group, a multidisciplinary clinical and research group focused on understanding and improving patient outcomes after critical illness and surgery, at Johns Hopkins University. Brodsky completed his PhD at the University of Pittsburgh and obtained his ScM in clinical investigation from the Bloomberg School of Public Health at Johns Hopkins University. He is a clinician, researcher, and international lecturer with interests in swallowing and swallowing disorders. His current research focuses on the effects of critical illness and critical care medicine on swallowing and its long-term outcomes. He is currently funded by a K23 Award from the National Institute on Deafness and Other Communication Disorders for a Phase I clinical trial designed to reduce post-extubation swallowing disorders in patients with acute respiratory failure. Brodsky is a continuing education reviewer for the American Speech-Language-Hearing Association, a frequent reviewer for several scientific journals, and a member of the American Speech-Language Hearing Association, Dysphagia Research Society, and the American Psychological Association.
