Practice Considerations for Older Adults With Dysphagia

FACULTY

James L. Coyle, PhD, CCC-SLP, BCS-S, teaches, conducts research, and trains SLP master's and doctoral students in the departments of Communication Science and Disorders and Otolaryngology at the University of Pittsburgh and co-developed the medical SLP clinical doctorate program. He is an ASHA Fellow and teaches nationally and internationally on issues related to diagnosis and management of oropharyngeal dysphagia in adults and the integration of disease pathophysiology in the management of swallowing disorders. Coyle is Board Certified by the American Board of Swallowing Disorders. He sees patients regularly and is currently funded by NIH to investigate and develop dysphagia screening instrumentation. He is concerned about the growth of the breadth of the professional mandate in health care settings, in light of the inability of educational programs to provide the necessary development of skill and education in these emerging areas to the level needed in modern health care settings.

Financial Disclosures:
- Associate professor at the University of Pittsburgh
- Financial compensation from ASHA for this presentation

Nonfinancial Disclosures:

Kevin Patterson, MD, obtained his MD in 2003 from New York Medical College before completing a residency in adult psychiatry at Western Psychiatric Institute and Clinic of the University of Pittsburgh in 2007. He subsequently worked as adult psychiatry faculty at the University of Pittsburgh in psychosomatic medicine, ultimately serving as the director of the Section of Psycho-oncology. A member of the American Association of Hospice and Palliative Medicine and expert in cancer care psychiatry, Patterson sees medically complicated patients with comorbid mental health conditions. He is also a distinguished clinical educator and lectures nationally and internationally on topics related to chronic illness and psychiatry.

Financial Disclosures:
- Psychiatrist in private practice
- Financial compensation from ASHA for this presentation

Nonfinancial Disclosures:
- Member of the American Academy of Hospice and Palliative Medicine and the American Psychiatric Association

Michelle Tristani, MS, CCC-SLP, is a regional director of resident services with Benchmark Senior Living. She has worked for Kindred Healthcare as the national rehab clinical specialist for speech-language pathology for 14 years. Tristani holds a BA in English and communication disorders from Boston College and an MS in speech-language pathology from the University of Rhode Island. Having practiced across the continuum of care from acute care to short-term rehab to long-term care, Tristani has specialized in adult and geriatric cognitive disorders. She has presented at many workshops, conferences, and seminars focusing on Alzheimer's disease and related dementias, assessment and management of cognitive disorders, swallowing disorders in
