Treating Acquired Apraxia of Speech: Practical Solutions to Common Challenges

FACULTY

Kirrie Ballard, PhD, CCC-SLP, has dedicated her career to studying the nature, diagnosis, and treatment of acquired apraxia of speech (AOS) and childhood apraxia of speech. She completed her professional training in Australia in 1983. Spurred by the lack of evidence to guide treatment, she completed a PhD (1997) at Northwestern University and a postdoctoral fellowship at the National Center for Voice and Speech, University of Iowa. She has published more than 80 research articles and book chapters and presented more than 30 workshops while holding academic positions at Indiana University, University of Iowa, and University of Sydney and honorary appointments at Neuroscience Research Australia and the Australian Centre of Excellence in Cognition and its Disorders. At the University of Sydney, she has served as head of speech pathology and director of the master's program. She is currently chair of the ANCDS committee for evidence-based practice guidelines for AOS and editor-in-chief of the *International Journal of Speech-Language Pathology*. She has attracted funding for her research from NIH in the U.S., the NHMRC and ARC in Australia, and Qatar National Research Foundation in Qatar, as well as professional groups such as ASHF and the National Stroke Foundation in Australia.

Financial Disclosures

- Professor at the University of Sydney
- Financial compensation from ASHA for this presentation
- Grant funding from NHMRC and ARC
- Editor of *the International Journal of Speech-Language Pathology* for Speech Pathology Association of Australia
