Apps and Web-Based Materials for Telepractice

INTRODUCTION

Clinicians providing therapies through telepractice environments face some technical challenges but can leverage a variety of interactive web- and app-based resources to engage clients while building speech and language skills. This webinar provides strategies and resources to locate and organize digital materials and explains how repurposing websites and apps using a speech and language lens can open doors to relevant, fun, and effective activities. The webinar also offers demonstrations of how to individualize authentic contextual materials.

LEARNING OUTCOMES
You will be able to:

- list websites and resources providing free materials to use in telepractice
- state and describe two methods and resources for building simple, authentic digital materials
- describe how to use interactive features of web portals and mobile devices to scaffold speech and language skills

CONTENTS

Video
Introduction ........................................................................................................... 5 min.
Building Engaging Materials .................................................................................. 33 min.
