Beyond Workbooks: Functional Cognitive Rehabilitation for Traumatic Brain Injuries

FACULTY

Don MacLennan, MA, CCC-SLP, is Chief of the Speech Pathology Section at the Minneapolis VA Health Care System. He has provided cognitive rehabilitation across the continuum of care for people with brain injury for well over 35 years. He is a frequently invited speaker in the area of cognitive rehabilitation and has published in the areas of assessment of pragmatic communication, return to college after brain injury, and staff development for polytrauma rehabilitation programs. He has served as a consultant to the Department of Defense on several projects related to cognitive rehabilitation for mild TBI. In 2008, he received the Rick L. Bollinger Clinician of the Year award for clinical excellence in his work with veterans experiencing blast injury and polytrauma. In addition to his clinical and administrative work, he serves on the VA Speech Pathology National Field Advisory Council and as a consultant on issues related to implementation of Assistive Technology for Cognition within VA.

McKay Moore Sohlberg, PhD, CCC-SLP, received her master’s degree in communication disorders and her doctorate in educational psychology, both at the University of Washington. She is a full professor and Director of the Communication Disorders & Sciences Program at University of Oregon as well as an ASHA Fellow. Sohlberg has published numerous articles, chapters, and manuals on managing cognitive impairments following acquired brain injury and is co-author of two leading textbooks in the field. She has been funded on a number of federal projects supporting the development and evaluation of assistive technology to deliver cognitive rehabilitation and to help individuals with cognitive impairment more fully integrate into their communities.
