FACULTY

Sharon G. Kujawa, PhD, CCC-A, is an associate professor of Otology and Laryngology at Harvard Medical School. She is the director of audiology research and a senior scientist in the Eaton-Peabody Laboratories at Massachusetts Eye and Ear Infirmary in Boston, Mass. She serves on the faculty of the Program in Speech and Hearing Biosciences and Technology at Harvard University. Kujawa is a clinician and an auditory neuroscientist, whose research seeks to clarify mechanisms and functional consequences of common causes of acquired sensorineural hearing loss and to translate that knowledge into improved diagnosis and treatments that benefit people. Her current work focuses on clarifying how noise and aging cause loss of cochlear synapses and neurons, determining the functional consequences of that loss, and identifying how the degeneration can be manipulated pharmacologically to reveal mechanisms and suggest treatments.

Financial Disclosures

- Associate professor of Otology and Laryngology at Harvard Medical School
- Director of audiology research and senior scientist in the Eaton-Peabody Laboratories, Massachusetts Eye and Ear Infirmary
- Research funding from NIH/NIDCD, the Department of Defense, and the Office of Naval Research
- Board member and consultant for Decibel Therapeutics
- Financial compensation from ASHA for this presentation

Nonfinancial Disclosures

- Scientific trustee for the Hearing Health Foundation
