TBI in Children and Adolescents: Developments in Clinical Practice

INTRODUCTION

Pediatric traumatic brain injuries (TBI) are underreported, which means that many children and teens are not getting needed services to help with post-injury cognitive issues that, though often mild, can cause academic and other difficulties. This webinar will discuss recent advances in the characteristics, recovery trajectories, assessments, and interventions for children and adolescents with TBI. Discussion will include evidence-based approaches to assessment and treatment that SLPs can implement immediately in clinical practice. The speaker will also discuss the important role of the SLP as a multidisciplinary team member treating this patient population and advocating for patients/clients/families.

LEARNING OUTCOMES

You will be able to:

- explain the most up-to-date information on the characteristics and recovery trajectories for children and adolescents with TBI
- translate evidence-based assessment and treatment information for children and adolescents with TBI into clinical practice
- generate a plan for advocating for the role of the SLP on a multidisciplinary team

CONTENTS

Introduction/Overview.................................................................................................................. 7 min.
Characteristics and Recovery Trajectories .................................................................................. 51 min.
Translating Evidence to Clinical Practice.................................................................................... 54 min.
Advocating for SLP’s Role......................................................................................................... 4 min.
Conclusion .................................................................................................................................. 5 min.

PROGRAM HISTORY AND IMPORTANT INFORMATION

Live webinar date: May 17, 2018
End date: May 18, 2022

To earn continuing education credit, you must complete the learning assessment on or before May 18, 2022.

To see if this program has been renewed after this date, please search by title in ASHA’s online store at www.asha.org/shop.
This course is offered for 0.2 ASHA CEUs (Intermediate level, Professional area).
