Take 5: Building on Student Strengths

INTRODUCTION

Dynamic assessment, which seeks to identify a child's individual skills and learning potential, can be a useful but labor-intensive process. In this course – which is broken into six 5-minute activities – the presenter will demonstrate how you can efficiently collect data through dynamic assessment using the META (Match – Extend – Try it – Assess) Map tool to extend and expand on the student’s communicative strengths. Then the presenter will guide you through actionable steps to use the tool and reflect on the results.

LEARNING OUTCOMES

You will be able to:
• Describe how to extend or expand on what is working for a student on your caseload using a dynamic assessment tool

CONTENTS

Introduction to Concept ........................................................................................................ 5 min.
Review Examples .................................................................................................................. 5 min.
Create a Quick Plan ........................................................................................................... 5 min.
Try Your Plan ...................................................................................................................... 5 min.
Reflect on Your Plan .......................................................................................................... 5 min.
Learning Assessment ......................................................................................................... 5 min.

PROGRAM HISTORY and IMPORTANT INFORMATION

Original program date: August 6, 2018
End date: September 15, 2023

To earn continuing education credit, you must complete and submit the learning assessment on or before September 15, 2023.

ASHA Professional Development is approved by the Continuing Education Board of the American Speech-Language-Hearing Association (ASHA) to provide continuing education activities in speech-language pathology and audiology. See course information for number of ASHA CEUs, instructional level and content area. ASHA CE Provider approval does not imply endorsement of course content, specific products or clinical procedures.

This course is offered for 0.05 ASHA CEUs (Intermediate level, Professional area).
