FACULTY

Evelyn R. Klein, PhD, CCC-SLP, BCS-CL, is a professor at La Salle University in the Department of Communication Sciences and Disorders. She is an ASHA Fellow and Board Certified Specialist in Child Language. She is also recipient of La Salle’s Lindback Distinguished Teaching Award and Distinguished Faculty Scholar Award. She received the Clinical Achievement Award from the Pennsylvania Speech-Language-Hearing Association. As a speech-language pathologist and psychologist, Klein is engaged in private practice and teaches, supervises, and advises students pursuing degrees in speech-language pathology. Her areas of specialization include selective mutism, autism spectrum disorder, stuttering, language disorders, and counseling for communicative disorders. At La Salle, she has been instrumental in development of the CASTLE Center (Comprehensive Assessments with Speech Technology for Language Expansion). Klein is published in numerous peer-reviewed journals and has co-authored many texts and treatment programs for children with selective mutism and other communication needs. She is on the Scientific Advisory Board of the Selective Mutism Association and has served as a research consultant with the Selective Mutism Research Institute.

Financial Disclosures
- Employee of La Salle University

Nonfinancial Disclosures
- Author of EXPRESS (Expanding Receptive and Expressive Skills through Stories): Language Formulation in Children With Selective Mutism and Other Communication Needs, sold through Plural Publishing, with all royalties donated
- Member of the Scientific Advisory Board of the Selective Mutism Association
Cesar E. Ruiz, SLPD, CCC-SLP, BCS-S, is a professor in the Department of Communication Sciences and Disorders at La Salle University. He is licensed and certified in speech-language pathology in Pennsylvania and New Jersey and holds Board Certification in Swallowing and Swallowing Disorders from the American Board of Swallowing and Swallowing Disorders. His specializations include evaluation, treatment, and research in the areas of voice, swallowing, and selective mutism. He has incorporated voice evaluation during the assessments of children with selective mutism. He is well versed in performing instrumental evaluations including modified barium swallows, surface electromyography, acoustic analysis, nasendoscopy, and videostroboscopy. At La Salle, he has been instrumental in the development of the CASTLE Center (Comprehensive Assessments with Speech Technology for Language Expansion).
