Intervention Strategies for People With Dementia and Cognitive-Communication Disorders

INTRODUCTION

This video course will help SLPs choose the best evidence-based interventions to target cognitive and communication disorders for individual clients at different stages of dementia. The speaker will discuss methods of measuring outcomes as well as case study examples.

LEARNING OUTCOMES

You will be able to:

- design and implement person-centered, evidence-based intervention plans based on assessment results
- implement appropriate interventions for people with dementia at different stages of the syndrome
- measure outcomes and demonstrate the impact of interventions to individuals with dementia, their families, and other health care professionals

PROGRAM HISTORY and IMPORTANT INFORMATION

Original recording date: February 20, 2019
End date: April 2, 2024

To earn continuing education credit, you must complete and submit the learning assessment on or before April 2, 2024.

To see if this program has been renewed after this date, please search by title in ASHA’s online store at www.asha.org/shop.

This course is offered for 0.1 ASHA CEUs (Intermediate level, Professional area).
