EVIDENCE-BASED PRACTICE

It is the position of the American Speech-Language-Hearing Association that audiologists and speech-language pathologists incorporate the principles of evidence-based practice in clinical decision-making to provide high quality clinical care. The term evidence-based practice refers to an approach in which current, high-quality research evidence is integrated with practitioner expertise and client preferences and values into the process of making clinical decisions.

Participants are encouraged to actively seek and critically evaluate the evidence basis for clinical procedures presented in this and other educational programs.

Adopted by the Scientific and Professional Education Board, April 2006

ASHA Self-Study 2021 SIG 2
INTRODUCTION

This Perspectives addressed the area of right hemisphere disorder (RHD). Topics covered include an overview of right hemisphere stroke, the figurative language deficits associated with RHD, lesion associated with affective prosodic deficits found in RHD, discourse deficits associated with RHD, and profiles in assessment of individuals with RHD.

LEARNING OUTCOMES

You will be able to:

- describe barriers to identification of right hemisphere disorder (RHD) after right hemisphere stroke, including inconsistencies in the literature
- discuss evidence-based assessment treatment principles that are used for individuals with RHD
- explain characteristics, including lesion location, of affective prosodic deficits associated with RHD
- describe discourse deficits associated with RHD and identify appropriate sampling techniques for this issue

PROGRAM HISTORY

Start date: June 20, 2016
Available through: May 22, 2019

IMPORTANT INFORMATION

To earn continuing education credit, you must complete the test with a passing score on or before May 22, 2019.

To see if this program has been renewed after this date, please search by title in ASHA’s online store at www.asha.org/shop.

ASHA Professional Development is approved by the Continuing Education Board of the American Speech-Language-Hearing Association (ASHA) to provide continuing education activities in speech-language pathology and audiology. See course information for number of ASHA CEUs, instructional level and content area. ASHA CE Provider approval does not imply endorsement of course content, specific products or clinical procedures.

This course is offered for 0.25 ASHA CEUs (Intermediate level, Professional area).
