INTRODUCTION

This Part of Perspectives addressed ethics in neurogenic communication disorders including decisional capacity and the role of the speech-language pathologist in the decisional capacity process, the role of the SLP in supporting medical decision-making for people with neurogenic communication disorders, cognitive-communication factors that place people at risk for impaired decisional capacity, and how aphasia awareness can impact ethical decision making.

LEARNING OUTCOMES

You will be able to:

- describe how decisional capacity is supported for people with neurogenic communication disorders
- demonstrate an understanding of how the SLP can directly support independent decisional capacity for persons with neurogenic communication disorders
- identify cognitive-communication factors that could impact decisional capacity for persons with neurogenic communication disorders
- determine how aphasia awareness is linked to the understanding of decisional capacity for persons with neurogenic communication disorders

PROGRAM HISTORY

Start date: November 30, 2018
Available through: November 28, 2021

IMPORTANT INFORMATION

To earn continuing education credit, you must complete the test with a passing score on or before November 28, 2021.

To see if this program has been renewed after this date, please search by title in ASHA’s online store at www.asha.org/shop

This course is offered for 0.20 ASHA CEUs (Intermediate level, Professional area).
