Clinical Supervision in a Medical Setting: A Preliminary Study About the Practices and Beliefs of Expert and Novice Clinician Supervisors by Casey Taliancich-Klinger and Solaman Cooperson 7

A Qualitative Study Describing Positive and Negative Supervisor-Student Clinician Relationships in Speech-Language Pathology by Jessica Atick Fencel and Jean Suzanne Mead 17

Perceptions of Mentoring SLPs and Clinical Fellows During the Clinical Fellowship by Maria Resendiz, Connie Summers, Roxanna Ruiz-Felter, Elizabeth Belasco, and Katherine Fox 25

Leading the Way With Supervision Training: Embracing Change and Transforming Clinical Practice by Samantha J. Procaccini, Kevin M. McNamara, and Natalie M. Lenzen 42

EVIDENCE-BASED PRACTICE

It is the position of the American Speech-Language-Hearing Association that audiologists and speech-language pathologists incorporate the principles of evidence-based practice in clinical decision making to provide high quality clinical care. The term evidence-based practice refers to an approach in which current, high-quality research evidence is integrated with practitioner expertise and client preferences and values into the process of making clinical decisions.

Participants are encouraged to actively seek and critically evaluate the evidence basis for clinical procedures presented in this and other educational programs.

Adopted by the Scientific and Professional Education Board, April 2006
INTRODUCTION

This Perspectives revealed the results of SIG 11 May 2016 survey and discussed the initiation of the application process and outlined the steps for Specialty Certification in Supervision. A qualitative study that explored the factors that constitute positive and negative supervisor-supervisee relationships was also discussed along with the differences in perceptions of supervision practices between novice and expert supervisors in the medical setting. The experiences and perceptions of both the mentoring SLP and the clinical fellow were explored. In addition, authors discussed the upcoming changes in supervision training requirements and how these changes may transform the fields of audiology and speech-language pathology.

LEARNING OUTCOMES
You will be able to:

- discuss the factors that constitute positive and negative supervisor-supervisee relationships
- discuss the difference in practices and beliefs of expert and novice supervisors in the medical setting
- describe how the mentoring speech-language pathologist and clinical fellow can maximally benefit from the clinical fellowship experience
- discuss the upcoming changes in supervision training requirements for audiology and speech-language pathology

PROGRAM HISTORY

Start date: August 4, 2017
Available through: July 3, 2020

IMPORTANT INFORMATION

To earn continuing education credit, you must complete the test with a passing score on or before July 3, 2020.

To see if this program has been renewed after this date, please search by title in ASHA’s online store at www.asha.org/shop.

This course is offered for 0.20 ASHA CEUs (Intermediate level, Related area).
