TABLE OF CONTENTS

Introduction and Learning Outcomes i
Faculty Disclosures ii

Benefits of a Multidisciplinary Tracheostomy Team: Acute Care Experience by Carmin Bartow, Nina Collins, Eugene Kopp, and Oscar Guillamondegui 89

A Patient- and Family-Centered Model of Feeding and Swallowing Management for Children With Tracheostomies by Arwen J. Jackson, Shaunda E. Harendt, and Christopher D. Baker 101

Management of Swallowing in Adults Undergoing Laryngotracheal Resection and Reconstruction by Allison Holman, Gemma Clunie, Justin Roe, and Tessa Goldsmith 113

Comparing Simultaneous Clinical Swallow Evaluations and Fiberoptic Endoscopic Evaluations of Swallowing: Changing Practice Patterns by Steven B. Leder and Heather L. Warner 124

EVIDENCE-BASED PRACTICE

It is the position of the American Speech-Language-Hearing Association that audiologists and speech-language pathologists incorporate the principles of evidence-based practice in clinical decision making to provide high quality clinical care. The term evidence-based practice refers to an approach in which current, high-quality research evidence is integrated with practitioner expertise and client preferences and values into the process of making clinical decisions.

Participants are encouraged to actively seek and critically evaluate the evidence basis for clinical procedures presented in this and other educational programs.

Adopted by the Scientific and Professional Education Board, April 2006
