

the GRIDGLASS SERIES

Expressive. Confident. Dynamic.

NEW!

Hello, GridGlass!

Basco's new GridGlass Series is perfect for anyone who is looking to make a statement. The bold design with clean cut lines creates a uniquely vintage yet modern look that catches the eye.

This dynamic GridGlass design is currently available for our Rotolo 905 and our Rolaire 935 in 3/8" glass with standard height and width options. AquaGlideXP can be added to this design.

DIGITAL PRINTING

Our GridGlass is created with Ceramic Frit Digital Printing Technology. The frit is fused to the glass during our in-house tempering process, meaning it is permanently bonded to the surface. This makes it as resistant to abrasion and chemicals as the glass surface itself. This durable, high-quality method ensures that your grid stays in pristine condition for years to come.

Printed grids offer you the same look as old-school metal panes, but make handling, cleaning and maintenance easy and safe.

*Rotolo Bypass Rolling Door (RTGA-905)
featuring 3/8" GridGlass with Matte Black Finish*

*Rolaire Panel/Rolling Door (ROGA-935)
featuring 3/8" GridGlass with Matte Black Finish*
