

# AQUAGLIDE<sup>XP</sup>

Protect Your Investment

## Factory-Applied AquaGlide<sup>XP</sup>

With minimal care, a Basco shower enclosure will stay clean for years to come.

Basco's AquaGlide<sup>XP</sup> is an ultra-protective coating that:

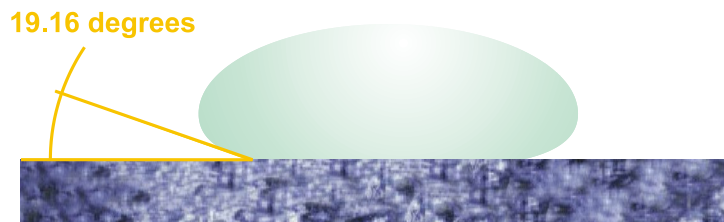

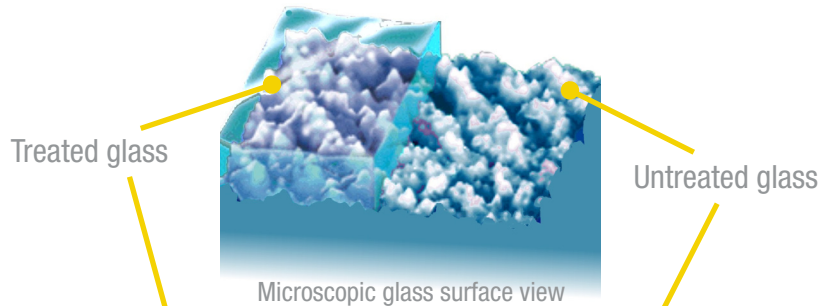

- Seals and protects the glass, repelling moisture, soap film and mineral deposits.
- Causes water to bead up on the glass.
- Prevents corrosion and preserves the beauty of the enclosure.
- Is similar to having a semi-permanent wax on your car or rain repellant on your wind shield.
- Is available with all glass options.

### Why have it applied at the factory:

- Our professionals have been trained to apply the coating evenly and properly.
- The protective coating is applied when the glass is in its cleanest condition, before it's ever used in a shower.
- Your customers' time is valuable, and the process of protecting the door after installation takes three steps.
- Includes a 10 year warranty when easy and proper maintenance is done.
