

JULY

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
26	27	Observe the ants. Where are they going? Why? Are they more active this time of year? Make a map and label the anthills. Check back later to see what changed!	29	30	01	02 Here in central New York we badly need rain. In many parts there is too much rain. What is the rain like where you are?
03 What kinds of weeds grow in your yard? Sketch some here and try to identify them.	04	05	06	07	08 Blackberries and raspberries are in season- Do you have any in your area?	09
10	11 This time of the year is best for tree identification. Find out what grows in your area.	12	13	14	15	16
17	18	19	20 Look for butterflies. In my area, I have been seeing a lot of swallowtails.	21	22 What are the bees doing where you are? Have you seen any of their hives? (You can sketch one- Just don't get close!)	23
24	25 4-H fair set up day.	26 Evaluation day	27 Exhibit set up and dish to pass	28 4-H Fair. Plant science workshop at 3:00	29 3:00- Horticulture Challenge- if you like it at our fair you can join the county team and do it again at state fair!	30 11:00- Plant science workshop 3:30- Plant science award ceremony

NATURE JOURNAL CALENDAR

See what's happening in the month of July. Then take notes about what's happening in your backyard here in this calendar!
