Over the last few months a group of wonderful volunteers have worked hard to improve our special place called 4-H Acres. This is our outdoor “learning lab” where our natural resources are valued, enjoyed and cared for by many.

The E.F. Schaufler Arbor

Dedicated to a Cornell Professor who developed many key plant science project resources for 4-H Leaders and 4-Hers.

Over the years he educated and inspired hundreds of youth and adults all across NYS, improving our environment one plant at a time.
