Did you know that the first frozen fruit sold by stores was in 1930 and was sold as Birds Eye Frosted Foods? Frozen foods have greatly improved since 1930 and are available everywhere. March is National Frozen Foods Month and it is a great time to focus on frozen vegetables and fruits. Frozen fruit and vegetables are picked, processed and frozen usually within 24 hours. Because the time from picking to freezing the produce is so short, frozen fruit and vegetables often have more nutrients than fresh. This is especially true during winter when fresh produce has to travel many miles and days to get to our stores. Look for sales this month on all types of frozen food at your supermarket.

**Tired of preparing vegetables and fruit the same way?**

**Try these ideas instead this month.**

1. Make sweet potato fries. Wash and slice whole sweet potatoes, drizzle with a little olive oil and sprinkle with cayenne pepper or chili powder and salt. Bake on a baking sheet at 400 degrees until cooked.

2. Choose frozen peach slices for a snack or dessert. Sprinkle the slices with a little ginger, a touch of honey and a few of your favorite nuts.

3. Cut winter squash in half, scoop the seeds and cut each half into slices. Drizzle with a little olive oil, cinnamon and brown sugar. Bake on a baking sheet at 400 degrees until the squash is soft.

**National Nutrition Month**

Each March, the Academy of Nutrition and Dietetics features a campaign focused on healthy eating. This year’s theme is “Put Your Best Fork Forward” and serves as a reminder to each of us that we hold the tool to making healthy food and beverage choices.
