Cornell Cooperative Extension is an employer and educator recognized for valuing AA/EEO, Protected Veterans, and Individuals with Disabilities and provides equal program and employment opportunities. Please contact our office if you have any special needs.

For over 100 years Cornell Cooperative Extension Orange County (CCEOC) has been making a difference in the lives of residents by utilizing the research-based resources of Cornell University to positively affect Agriculture, Families and Youth, Environment, and Economic Development in Orange County.

The Education Center and 4-H Park will allow us to significantly increase our educational outreach, while providing a state-of-the-art facility for Orange County and surrounding communities.

Our vision – being built in three phases – includes multi-purpose educational/meeting-use buildings with a commercial kitchen, campground, greenhouse, arenas, and livestock shelters. The entire Park will be built using green infrastructure to minimize impact on the environment while being energy efficient.

How you can help:

- ◆ Attend a fundraiser
- ◆ Donate to our Capital Campaign
- ◆ Make a monthly or yearly pledge
- ◆ Sponsor an event, piece of equipment, or a building
- ◆ Volunteer your time by serving on a committee or in one of our programs

Yes! I/We would like to help! Donations are tax deductible.

Major Facilities

Construction will be in three phases in the next five years.

◆ **EDUCATION CENTER / Memorial Building (110x120):**

This year-round Education Center will be the center of hundreds of Extension's programs featuring a teaching kitchen, quiet space for children to read, family programming, and handicapped accessible.

◆ **ENVIRONMENTAL TECHNOLOGY**

DEMONSTRATION AREAS: The buildings and surrounding areas will incorporate designs and technologies to minimize energy use, produce renewable energy (solar, wind, biomass, etc.), conserve water, purify and recycle stormwater, compost food waste, provide wildlife habitat, and demonstrate sustainable landscaping.

◆ **OPEN FENCED ARENAS (1 LARGE [150x300], 1 SMALL [100x200]):** These rings will be designed for horse shows and exhibitions such as farm equipment, antique car shows, and anything else that requires a fenced-in area.

◆ **RESTING PARK:** This area would include gazebos and garden sitting areas.

◆ **POLE BARNs:** Six pole barns will be constructed. Five will be open on all sides, with portable pens and stalls built for livestock. One will be enclosed for various usage and programming. These barns could also be used for events such as school programs, outdoor breakout areas for youth camps, animal classes, agricultural, or family-oriented trade shows and more.

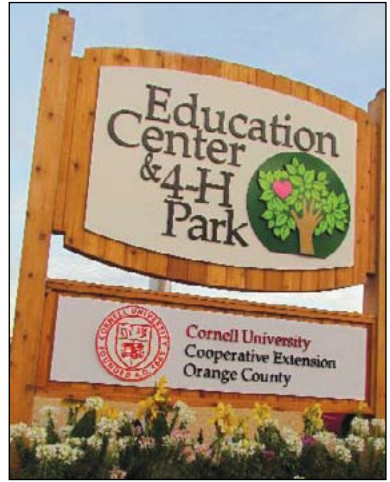

◆ **MILKING PARLOR:** This will be used to demonstrate the milking process of cows and goats to the public.

◆ **BIG RED BARN (40x100):** This would be our primary agricultural education building, featuring stalls, exhibit space and workshop areas to provide hands-on experience. "Farm to Table" play stations will entice young and old.

◆ **GREENHOUSE:** This facility will be used for research trials, vocational education, and by the Master Gardener Volunteers to propagate plants for use at the Park as well as for projects throughout Orange County.

◆ **COVERED ARENA (75x150):** This large clear span building would be used for animal shows, small concerts, trade shows, and 4-H dog training. Family & Consumer Sciences will host family events and demonstrations.

◆ **CAMPING AREA:** This is designed for residential camping use.
