Environmental Experiences

FOR EARLY CHILDHOOD

Project Learning Tree Early Childhood

Are you a teacher of children ages 3-6? Would you like to bring your students out into the environment or bring the environment into the classroom, but unsure of how? Then the Project Learning Tree Early Childhood Workshop is for you.

During the workshop, participants will do some of the activities in the curriculum guide. After the training, participants will get their own guide to use in the classroom. The curriculum guide comes with a music CD and extensions for activities that family members can do with the child outside.

To request a training at your facility please email Victoria Londner at VL232@cornell.edu
