## Soil pH Test Submittal Form

Name: \_\_\_\_\_ Date submitted: \_\_\_\_\_

Mailing address: \_\_\_\_\_

Email (for fastest response) : \_\_\_\_\_

Daytime phone: \_\_\_\_\_

Please give this sample a name for future reference: \_\_\_\_\_  
(i.e. front lawn, side garden, flower bed, veg garden)

What are you growing here? \_\_\_\_\_

Why are you testing the soil?  Routine check  
 Having a problem, please describe:

*(Office use only below this line)*

### Test Results

Your soil pH is \_\_\_\_\_ Your soil type is \_\_\_\_\_

This pH is in the normal range for your crop, or close enough that no correction is needed.

This pH is too low. Add \_\_\_\_\_ lbs of lime per 100 square feet. Mix into the soil before planting if possible. Woodstove ashes are half as potent as lime.

This pH is too high. Add \_\_\_\_\_ lbs of sulfur (powder or granule) per 100 square feet. Mix into the soil before planting if possible.

This soil needs more organic matter. See enclosed brochure.
