Dairy Management Specialist with Southwest NY Dairy, Livestock and Fields Crop Program

The Southwest New York Dairy, Livestock and Field Crops Program (SWNYDLFCP) focuses on improving the productivity and profitability of the dairy industry in the Southern Tier region of New York. As part of a three person regional team, this position will develop and deliver educational programs and applied research projects that address identified dairy management issues. As a Dairy Management Specialist you will potentially work in the areas of nutrition, reproductive management, milk quality, replacement management and more.

This position will be located in Steuben County, covering from Bath to Jamestown. The region lies along the New York – Pennsylvania border, with easy access to many outdoor activities. Buffalo, Rochester, Syracuse, Binghamton and the Finger Lakes region are all an easy drive.

Skills we are looking for:

- 
- MS required
 - Knowledge of philosophy and objectives of informal education system
 - Strong interpersonal skills
 - Proven organizational and time management skills
 - Experience in obtaining grant funding
 - Strong leadership and teamwork skills
 - Effective written and verbal communication skills
 - Appreciation of Agriculture as a business and lifestyle
 - Program Development, Implementation and Evaluation – based on identified needs
 - Program Management – responsible for program operations, reporting and accountability
 - Professional Improvement – professional development opportunities
 - Organization Leadership – participate in program development work teams, committees and advisory groups

Areas of Work Interest:

- Nutrition
- Reproductive Management
- Facilities
- Dairy Record Analysis
- Calf and Heifer Management
- Herd Health
