Tompkins County Guidelines

Early Release Policy: The Livestock Program Development Committee has approved the following guidelines for early release of animals:
- The dates of the 4-H Youth Fair are published at least 10 months in advance, and every effort must be made to adhere to the regular release time frame; consideration for early release will only be considered in extreme emergencies or situations.
- The exhibitor should first try and find another exhibitor, member of their club, or family member to care for their animals for the duration of the Fair, and in their absence.
- All requests must be made in writing and received in the 4-H Office at the time the animal entry forms are due. The request must indicate reason for early release.
- Should an emergency arise after the animal entry forms have been submitted, the exhibitor should contact 4-H staff immediately to discuss options.
- If request for early release has been granted, the exhibitor must arrange an appropriate time with 4-H staff.
- Decisions will be made at staff and/or committee discretion.

All animals staying overnight at 4-H Acres must be screened and approved during the regular vet check times. No animal will be allowed to stay overnight without going through this process. Check the schedule for vet check times. Lactating animals may arrive for the day of show only – they cannot stay overnight unless a veterinarian is scheduled. It is recommended that they arrive within 3 hours prior to the show, and leave within 3 hours after the show.

- All cattle and swine must be identified by USDA approved official ear tag.
- Rabies vaccination lower age limit is 4 months.
- Category 2 veterinary accreditation is now required.
- All goats (over 4 months of age) must be off-labeled vaccinated for rabies.
- All poultry must show proof of negative Pullorum test
Exhibitor Pre-fair Guidelines for NY Youth, County and State Fairs
For questions call 518-457-3502

**Cattle, Sheep, Goats, Swine, Llamas and Alpacas, Cervids, Misc. Ruminants**

- Review the animal health requirements booklet including information for your species before your veterinarian arrives to inspect your animals. If you have any questions, ask.
- Your veterinarian is responsible for inspecting your animals and completing the certificate of veterinary inspection (CVI). Call early to avoid the last minute rush when mistakes are made and there is no time to correct.
- Make sure 840 eartags (RFID or visual) are present on cattle and swine and USDA approved scrapie ID is in place on sheep and goats.
- **ALL IDENTIFICATION MUST BE RECORDED. Make sure it is.**
- Review the CVI carefully upon receipt to make sure all the information is correct including any required test or vaccination information.
- DO NOT stuff it in an envelope and assume all is well. The time to correct is before pulling them out at the fair. The CVI is your document and you share responsibility if it is incorrect.
- If you are importing livestock from out of state make sure the interstate requirements are met and you have a valid interstate certificate of veterinary inspection.

**MOST IMPORTANT** When it comes time to load your livestock for the trip to the fair take the time to examine them. Makes sure they are the same animals that are on the paperwork and if they are showing any signs of illness LEAVE THEM HOME.

**General Prohibitions and Requirements**

- No person shall bring or have present an animal on the fairgrounds during a fair which is not qualified under NYS regulations.
- No person shall present an interstate or intrastate certificate of veterinary inspection that has been altered by anyone other than the issuing veterinarian or an authorized agent.
- Animals demonstrating clinical signs or other evidence of infectious, contagious or communicable diseases shall not be allowed on the fairgrounds during a fair.
- Representatives of the Commissioner may deny admission to or require removal from the fair premises, or require the segregation of any animal showing signs of or exposed to any infectious, contagious or communicable disease.
  
  **Note:** The fair board of directors has the authority to reject unworthy or unsightly exhibits for reasons other than infectious, contagious or communicable disease (Part 350.10). The state veterinarian or animal health inspector will bring questionable exhibits to the attention of the fair board.
- All animals presented that originate from a location other than New York shall meet all New York State importation regulations appropriate to the species in addition to the fair animal health requirements.
Certificates of Veterinary Inspection (CVI)

- Cattle, sheep, goats, swine, llamas, deer, alpaca and misc. ruminants, camels and elephants require a valid CVI to enter the fairgrounds.
- The CVI must be issued by a Category 2 accredited veterinarian.
- All animals must be uniquely identified. All manmade ID must be recorded. Refer to Animal Identification section below for more information.
- Only one species is allowed per certificate.
- The type and duration of certificate required depends on the origin of the livestock.

New York Origin Livestock:

- A valid intrastate CVI (AI 61) is required.
- Each animal must be individually identified on the CVI.
- The CVI must be issued on or after May 1 of the current year.

Out of State Origin Livestock:

- All animals entering New York State must satisfy import health and test requirements for that species and be accompanied by a valid interstate CVI.
- The interstate CVI is valid for 30 days from the date of issuance. During the fair season (July 1 through Labor Day) valid CVI’s can be used multiple times for entrance into fairs. The initial entrance into a fair must be within 30 days of issuance. In order for the CVI to be used for a later fair, it must be dated and initialed by a state official noting the location of the initial fair. A change in health status or eligibility of an animal necessitates the generation of a new CVI.
- Questions regarding import requirements should be directed to the Division of Animal Industry at 518-457-3971, or at the division’s import/export homepage: http://www.agriculture.ny.gov/AI/import_export.html

Animal Identification

- All manmade ID must be recorded.
- Cattle must be identified by an official USDA radio frequency identification (RFID) eartag, commonly referred to as an “840 RFID tag,” or an equivalent official RFID tag if the animal was tagged in another country. Cattle which are already identified with 840 visual eartags will be exempt from the 840 RFID tag requirement.
- Sheep and goats must be identified by official scrapie identification (see sheep and goat sections below).
- Swine must be identified by an official USDA radio frequency identification (RFID) eartag, commonly referred to as an “840 RFID tag” or an equivalent official RFID tag if the animal was tagged in another country. Swine which are already identified with 840 visual eartags will be exempt from the 840 RFID tag requirement. Nursing piglets do not have to be individually identified if the sow is correctly identified on the CVI and the number of piglets in the litter is noted on the CVI.
- Deer/elk must be identified with an official eartag.
- Llamas and alpacas must be identified by official eartag or microchip.
- Misc. ruminants must be identified by unique eartag or microchip.
• A complete written description is sufficient identification for horses entering New York accompanied by a CVI. The description must match the EIA test record. Horse sketches and descriptions should reference color pattern, hair whorls, chestnuts, scars and other markings as necessary to uniquely identify the horse. Tattoos and microchips if any should be included. “Bay, no markings” is not an acceptable description for a CVI or EIA test record.
• NOTE: If you are exhibiting animals identified by microchip, a working reader must be supplied by the exhibitor.
• For questions on animal identification please contact your veterinarian or our office at 518-457-3502.

Rabies Vaccination
• Current rabies vaccination is required for all species for which there is a USDA licensed vaccine available (cattle, horses, sheep, dog, cat, ferret) and that are 4 months of age or older on the date of admission to the fair.
• Vaccine must have been administered within the past 12 months. The exception is Imrab LA vaccine used in sheep which protects for 3 years after the second annual vaccination (consult your veterinarian).
• The rabies vaccination requirement must be met on the day of admission even if the animal was previously admitted to a fair when too young to vaccinate.
• Note: Individual fairs can require animals for which there is no approved rabies vaccine to be currently vaccinated for rabies. The requirements outlined above would apply. The fair is responsible for notifying exhibitors.
• The New York State Fair requires rabies vaccination for all livestock species entering the grounds.

Acceptable Proof of Rabies Vaccination
• Acceptable proof of rabies vaccination must include a signed written statement from the attending veterinarian or a valid certificate of veterinary inspection that has the vaccination listed and is signed by the Category 2 accredited veterinarian.
• Acceptable proof of vaccination must include the name of the product used, the date of administration and the duration of immunity if longer than one year.
• If the statement of rabies vaccination is included on an EIA test record, it must be signed separately in addition to the required EIA test record signature.
• NOTE: Rabies titers are not acceptable proof of rabies protection and cannot be used to meet entry requirements.
• Acceptable proof of vaccination for dogs is a valid vaccination certificate or a copy of the dog license that contains the rabies vaccination information.

BVD-PI Testing
• All cattle, llamas and alpacas exhibited at NY county fairs or the State Fair must be negative to an approved test appropriate to detect Bovine Viral Diarrhea persistent infection (BVD-PI). This is a once in a lifetime test that must be reported on the required certificate of veterinary inspection. The issuing veterinarian is responsible for verifying the validity of the test, the identification of the animal and recording the test date on the CVI. If a previous test is not verifiable the test must be repeated.
Cattle Testing:
- Currently acceptable BVD tests for cattle less than 61 days old:
  - Skin notch Antigen Capture ELISA (ACE) or Immunohistochemistry (IHC)
  - whole blood virus isolation
  - whole blood PCR
- Currently acceptable BVD tests for cattle 61 days of age and older:
  - Skin notch Antigen Capture ELISA (ACE) or Immunohistochemistry (IHC)
  - Serum or milk Antigen Capture ELISA (ACE)
  - Whole blood virus isolation
  - Whole blood, serum or plasma PCR
The Animal Health Diagnostic Center at Cornell University can conduct testing on pools of up to 10 cattle.

Calving, Kidding, and Lambing
- Any cattle, goats, or sheep that calve, kid, or lamb while at a county fair or the State Fair will be ordered removed from the fairgrounds along with their offspring, unless the animals are part of a birthing demonstration.

Commingling of Sheep and Cattle
- Due to the potential spread of malignant catarrhal fever from sheep to cattle, it is recommended that cattle be kept separate from sheep.

Commingling of Swine and Poultry
- Due to the potential spread if influenza viruses it is recommended that swine and poultry be housed in separate locations.

Isolation on Returning Home
- The owner or custodian shall keep show animals biologically separate from the herd or flock for a period of at least two weeks after returning to the premises of origin. If an illness is noted in the exhibition animals the owner should contact their veterinarian immediately.

YOUTH LEADERSHIP POSITIONS

Assistant – This is a good position for youth of any age, but especially for 8–12 year olds. Little or no 4-H Fair experience is necessary. Duties may include running errands for staff, judges, teen superintendents, or volunteers; serving customers in the Country Kitchen Express Lane; helping with set-up and tear-down of contest/exhibit areas; transporting judged exhibits to display area. Assistants must be cheerful, be able to communicate with adults, and be able to follow directions. Assistants will be recognized at the Awards Ceremony.

Steward – The position of Steward is a great opportunity for youth who have some knowledge and experience in the project area they select. This is especially good for youth 11 years of age and older. In many cases, the Steward works closely with the judge and, therefore, should have good oral and written communication skills. Duties may include writing comments, attaching ribbons to entry tags, documenting statistics on entries, helping arrange exhibits for display. Stewards will be recognized at the Awards Ceremony.

Superintendent – This position is for youth 13–19 years of age who have knowledge and experience in their selected project area. They will have significant responsibility for the project area or contest; will work closely with staff, key volunteers and judges to complete assigned tasks. Superintendents are required to participate in the pre-fair clean-up / set-up day, attend an orientation meeting, and help with tear-down at the end of fair. Outstanding Superintendents will be recognized at the Awards Ceremony.

**ABOVE AND BEYOND AWARD**
This award recognizes the Teen Superintendent that goes “above and beyond” their job responsibilities. It is not based on quantity of positions held, but the quality of the job they do. This is a peer-selected award, and each superintendent has the opportunity to cast one vote. Look for the voting box near the Superintendent names posted on the wall in the large room in Kiwanis Hall. The recipient(s) will be announced at the Awards Ceremony, and will have their name(s) engraved on a plaque.
