Many thanks to the organizations listed in this directory for providing this information. Every attempt has been made to assure the accuracies of the submissions. However, if there is an error or omission, please notify us and we will make the necessary change and notify directory recipients by email on a periodic basis. In the meantime, we hope that you find this document a useful tool in carrying out the important work that you do to improve the quality of life for all Columbia and Greene County residents.

Objective: Assist Columbia County residents to make energy efficiency improvements to their homes.

Services provided through the following programs:

Weatherization Assistance Program

This program helps income-eligible households by reducing their energy costs and improving the safety of their homes through the installation of energy efficiency measures. Both single-family and multi-family buildings may be weatherized. Services are available to homeowners, renters and landlords with income eligible tenants. Income eligibility guidelines must be met.

EmPower New York Program

Sponsored by the New York State Energy Research and Development Authority (NYSERDA), this program also assists households with a limited income to take control of their energy use. COI will evaluate the home and provide energy efficiency services such as high-efficiency lighting, refrigerator replacement, and insulation. This program is also available to people who may have received our regular weatherization services in the past.

NYSERDA Home Performance with Energy Star Program

This program offers valuable financial cash back incentives, grants, and low interest financing that help make energy efficiency improvements affordable for most people. COI can work with homeowners with an annual gross income up to \$284,000. Free energy audits are available if the annual household income is less than \$142,000.
