

SPRING SCIENCE

Sprout House

Build your own sprout house with simple supplies you can find around your house! You choose the seeds, some suggestions are: wheat berries, chia or alfalfa seeds (they tend to grow the fastest). Decide how big you want your house to be and maybe what color sponges you want to use, get creative!

Supplies:

- 4 plain sponges
 - Scissors
 - Toothpicks
- Glue gun (not necessary but makes easier)
 - Plate
 - Seeds

Steps:

- Decide how you would like to build your sprout house and cut the sponges and stick them together using your toothpicks and the hot glue gun if needed.
- Once your house is built, spread the seeds all over the sponges, you can use different seeds for the bottom, roof etc.
- Fill the plate with water
- Continue to spray and water your house daily.
