Instructions for taking samples: For best results be sure each sample is comprised of 5 to 10 individual samples obtained by walking back and forth diagonally across the area to be sampled. Mix the 5 to 10 individual samples in a clean plastic pail. Then remove two 8 ounce cupfuls of the mixed soil and place this in a plastic bag. Identify each sample on the outside of the bag and place this identification in the appropriate column on this form.

Submitting soil samples: The Soil Testing Lab is located at the **Education Center, 423 Griffing Avenue, Riverhead, NY**. A drop off box is located at the rear door entrance for after hour and weekend drop off. Samples dropped off at the Bayard Cutting Arboretum location will be transferred to the Education Center. Samples are tested once or twice a week. Samples can not be tested at the time you drop them off.

Payment: The fee for soil pH testing is **\$5.00 per sample** (\$3.50 per sample when submitting **5 or more samples**). Payment is due when samples are dropped off or should be included with samples that are shipped to the Education Center.
