

WINTER QUICK TIPS

Building Healthy Habits: Food and Community Nutrition

Make the Most of Your Food Shopping Dollars

Food prices have increased dramatically over the past year. Try these ideas to make the most of your food shopping money.

1. See what you already have in your cupboards, refrigerator, and freezer so you don't rebuy these items.
2. Make a list of meals and snacks you need to shop for - a week, two weeks? What foods do you already have that you can use to make meals or snacks? Add to your shopping list other fruits, vegetables, dairy products, whole grains, and lean protein foods you need to complete the meals and snacks you have on your list.

3. Remember to consider fresh, frozen, canned, and dried fruits and vegetables when making your list. All varieties are healthy!
4. Finish your list so it is organized to follow the aisles where you shop. This will save you time and help you not to forget anything you need.
5. Compare prices when shopping. Store brands are usually less expensive.
