

CORNELL COOPERATIVE EXTENSION, ROCKLAND COUNTY

Presents

From Egg to Adult: Exploring the Nesting Cycle

We may take them for granted, but now they need our help. Breeding songbirds have declined by 30% over the past several decades. Learn about the nesting process from start to finish. Gain an understanding of the incredible demands on the birds, the miracle of success and how to help.

Citizen Science Add -on: Supervised monitoring of established Eastern Bluebird Nest Boxes over the course of a life cycle. Data collected will be entered in Cornell Lab of Ornithology's Nestwatch participatory science database.

Let's help restore their numbers!

When: Late March–June Cost: \$15 per scout

Where: CCE Rockland, Stony Point; Nest box visits in New City

Contact: Cheryl Duber - cd692@cornell.edu
