

Moonlight *in the* Garden

Meet Nature's Night Shift!

Did you know our gardens come alive after dark?

Get ready to discover the secrets of the garden after sunset!

Lots of plants, insects, birds, and mammals are actually busier at night than during the day. Come explore how they move, eat, hide, and communicate after the sun sets.

We'll shine a light on nighttime nature with cool facts and a fun science experiment. Learn how you can make their lives easier.

When: April-June

Where: CCE Rockland – 10 Patriot Hills Lane, Stony Point

Cost: \$12 per scout
