ENVIRONMENTAL SERVICES

Environmental Services for Any Project

BOW Consulting Group is a multidisciplinary consulting firm providing development, engineering, environmental, geospatial, construction, and project management services across a wide range of infrastructure, energy, utility, commercial, industrial, transportation, and public-sector projects. Our team partners with clients throughout the project lifecycle, delivering practical solutions that help navigate complex challenges, manage risk, and achieve project objectives. By combining technical expertise with a collaborative, client-focused approach, BOW helps move projects efficiently from planning and permitting through design, construction, and implementation.

How We Work

BOW Consulting Group provides integrated environmental planning and permitting support from project feasibility through construction. We collaborate with clients to identify constraints, develop practical solutions, and advance projects efficiently through the permitting process. Our approach emphasizes proactive coordination, technical expertise, and responsive project support to help reduce risk and keep projects on schedule.

Why BOW?

BOW Consulting Group brings together environmental scientists, permitting specialists, planners, and technical experts under one team, allowing us to provide comprehensive support across a wide range of project needs. Our in-house capabilities foster seamless collaboration, responsive communication, and practical solutions tailored to each client's objectives.

- Multidisciplinary team of environmental and technical experts
- In-house capabilities that improve coordination and efficiency
- Strong collaboration across environmental, engineering, and development teams

Compliance and Peace of Mind

BOW Consulting Group provides environmental consulting services throughout the project lifecycle, from site evaluation, permitting construction support, and compliance assistance. Our team supports a wide range of infrastructure, utility, energy, commercial, industrial, and land development projects across the United States. As a trusted advisor, we offer environmental planning, project evaluation, regulatory coordination, construction monitoring, and technical expertise to help clients successfully navigate complex project requirements.

Environmental Planning & Permitting

- Critical Issues Analysis and Site Evaluations
- Environmental Planning and Due Diligence
- Constraints Mapping and Design Coordination
- Agency Consultation and Regulatory Coordination
- Public Meetings, Hearing Testimony and Expert Witness Support
- Zoning, Land Development, and Right-of-Way Coordination
- Federal and State Incidental Take Permits
- Bald and Golden Eagle Take Permits

Environmental Studies & Natural Resources

- Wildlife, Plant, and Habitat Surveys
- Wetland and Waterway Delineations
- Endangered Species Evaluations
- Section 7/10 Consultations
- Habitat Conservation Plans
- Bird and Bat Conservation Strategies
- Eagle Conservation Plans
- Biological Research and Studies

Construction & Operations Support

- Biological Construction Monitoring
- Environmental Compliance Monitoring
- Post-Construction Monitoring
- Long-Term Monitoring and Reporting
- Agency Coordination and Reporting

01

Siting & Preliminary Site Evaluation

Site with Intelligence

BOW's early siting and preliminary site evaluations identify environmental constraints and permitting risks early in a project lifecycle. Our integrated in-house teams deliver fast, reliable assessments — combining field expertise with advanced GIS and constraints-mapping tools — to keep projects moving from the earliest stages.

02

Environmental Studies

Documentation Made Simple

BOW supports developers through the permitting process by preparing environmental permit applications, coordinating with regulatory agencies, and assisting with technical and environmental documentation. Our team works closely with project stakeholders to streamline approvals, address environmental and regulatory requirements, and keep projects moving toward construction.

03

Permit Support & Regulatory Plan Development

Planning Done Right

BOW prepares permit applications, conservation plans, construction plans, and operations & maintenance (O&M) plans that satisfy regulatory requirements and keep projects compliant from approval through operation. Our integrated approach streamlines permitting and delivers practical, implementable plans that reduce environmental and development risk.

04

Construction Monitoring & Compliance

Construct with Confidence

BOW provides on-site environmental and biological construction monitoring to keep projects in compliance with permit conditions and regulatory requirements. Our team identifies and resolves issues in the field, coordinates with contractors and agencies, and documents compliance to protect sensitive resources and keep construction on schedule.

05

Post-Construction Monitoring & Compliance

Operating with Ease

BOW conducts post-construction and long-term monitoring to verify project compliance, evaluate habitat and species impacts and outcomes, and satisfy ongoing permit and reporting obligations. Our team coordinates with O&M staff and agencies and documents results to demonstrate compliance and support successful project operation.
