- Microsoft Certified Power BI Data Analyst
- Content Developer @ DataCamp
Agenda

1. Analysis and access
2. Live training
3. More learning resources
Analysis and access
About this webinar

Data
A subset of the data from the Fjelstul World Cup database. A comprehensive database about all World Cup tournaments (1930-2018). The database contains 27 datasets, but for our analysis we’ll be using 5.

Key Questions:
- Which country scored the most goals?
- Which country reached the most finals?
- Which year did teams score the most goals?
- Is there an advantage for the host country?
How to install Power BI Desktop

- Go to the Power BI section of the Microsoft website - [www.microsoft.com/powerbi](http://www.microsoft.com/powerbi)
- Click on “Products” from the menu in the top of the web, and select “Power BI Desktop”. 
How to install Power BI Desktop

- Click on the “Download free” option
How to install Power BI Desktop

- Select your desired language from the dropdown menu, then click on “Download” to proceed with the installation process.
How to access the workbook

- The **Power BI workbook** can be accessed via link sent through the chat. It can also be accessed from the following GitHub **repository**.
- Any additional resources that will be utilized throughout the webinar will be available with this link.
Live Training

Taking courses on DataCamp

1. Take the course on DataCamp
   - Power BI on a Datacamp virtual machine in your browser.
   - Follow the instructions to complete the exercises.
   - That's it. Everything is prepared for you here in the browser!

2. Take the course on your local machine
   - Power BI on your local machine.
   - Make sure you have Power BI Desktop installed, or download it here.
   - Download the exercises and datasets from the course overview page. Follow the instructions on DataCamp.

   - Note Power BI is only supported by the Windows operating system.
