

DataCamp Live Training: Setting up your Environment

Richie Cotton
Curriculum Architect

Today's goal

Get your PC or laptop set up so
you can start running analyses on it
in R.

Part 1

- Installing R
- Installing an IDE: RStudio
- Installing a coding font
- Customizing RStudio
- Q & A

Part 2

- Installing packages from CRAN
- Installing packages from GitHub
- Customizing R startup
- Using RStudio projects
- Q & A

Part 3

- Installing git
- Creating a GitHub account
- Setting environment variables
- Installing packages from private GitHub repositories
- Q & A

<http://faturl.com/k01fyt2>

Let's begin!

Recap and Closing Notes

What Did We Learn Today?

Installing and customizing R and RStudio

Font, appearance, tabs, highlighting, working directory

Installing packages and customizing R startup

CRAN, GitHub, global options, aliases

Working with GitHub

Installing git, creating GitHub account, environment variables, private repositories

Coming Soon!

Don't miss these upcoming webinars and live training sessions!
