RELAX® DECKING

featuring Rise® Technology 

THE SMARTER ALTERNATIVE
TO WOOD

RELAX DECKING | THE BETTER ALTERNATIVE

COMPOSITE DECKING BENEFITS AT A WOOD DECKING PRICE

WHY SETTLE FOR WOOD?

With new Relax Decking from Fiberon, there's no reason to settle for the shortcomings of wood decking. Relax Decking features Rise Technology, a unique process that fuses together recycled synthetic carpet fibers for unbeatable strength and durability. Plus, Relax Decking isn't affected by moisture, and won't crack, split, or splinter. It's ideal for any wood decking need.

Available in two popular colors, Relax Decking is easy to install, easy to maintain, and eco-friendly. It's long lasting and priced right – meaning you'll never need to settle for wood decking again.

A SMARTER, STRONGER ALTERNATIVE TO WOOD

UNBEATABLE PERFORMANCE

- Will not crack, splinter, or decay like wood
- No wood fillers that promote mold growth
- Tough and strong (higher break strength than most composites)
- Resists swelling and damage due to freeze/thaw cycles

PROVEN DURABILITY

Relax Decking has passed ASTM D7032 code testing for:

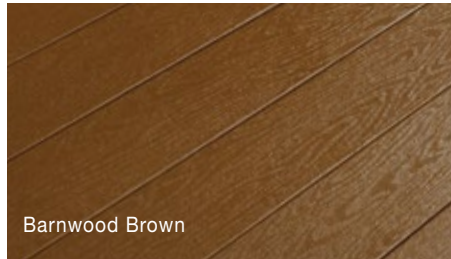

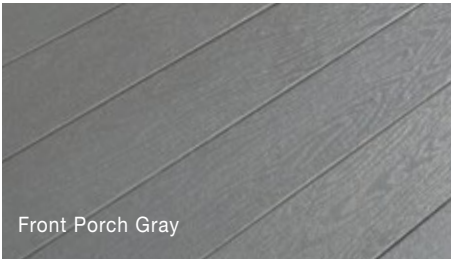

- Strength
- UV exposure
- Weathering
- Slip resistance
- Moisture
- Stair tread loads
- Freeze-thaw

HIGH PERFORMANCE COATING

- Prefinished with a new cross-linked polymeric coating that's tougher than acrylic
- Water resistant - virtually waterproof
- Stain resistant - similar to capped composite materials
- Fade resistant - warranted for five years against fading greater than 5 delta E (excludes coating wear caused by abrasion)
- Can be re-stained using factory stains to maintain performance and appearance or to change color

EASY FROM START TO FINISH

CHOOSE YOUR COLOR

Two popular colors work with any architecture or décor.

Square Edge = .93 in. x 5.3 in.
Length: 8 ft., 12 ft., and 16 ft.

INSTALLS LIKE WOOD

- Cuts and machines similar to wood
- Works with common composite deck screws and pneumatic nails
- Nail or face-screw within 1 in. of edge with no cracking
- Joist spacing – 16 in. on center

EASY ON THE ENVIRONMENT

- Contains 94% post-consumer/commercial recycled content
- Made from recycled synthetic carpet fibers
- In 2018, approximately 20M lbs of recycled carpet fiber will be converted into Relax Decking
- Doing so will remove nearly 40M lbs of discarded used carpet from California landfills
- Producing Relax Decking reduces the carpet waste stream, creates local jobs, and promotes sustainable business practices

PEACE OF MIND PROTECTION

Will not check, splinter, rot, or suffer structural damage from fungal decay (when installed and maintained correctly)

15-YEAR RESIDENTIAL LIMITED WARRANTY

- a. Performance Warranty: Fiberon Relax Decking shall, under normal and proper service conditions, remain free from material manufacturing defects and will not check, splinter, rot, or suffer structural damage from fungal decay, when installed, used, and maintained in an above-ground application and in accordance with Fiberon's written instructions. Homeowner must maintain proper surface coating with Fiberon Relax Decking coating products.
- b. Term: Fifteen (15) years from the date of original purchase by or for a residential application as long as the Original Purchaser owns the property upon which the Fiberon Product was installed.

CARE INSTRUCTIONS

- Clean spills or other staining materials with water and normal deck cleaners, broom scrub, and rinse.
- Pressure washers are not recommended, as they could damage the surface if pressure or impact is not adequately controlled.
- For warranted performance, periodically re-coat as needed with the available Fiberon factory finish. Coating will resist fading due to UV rays; however, foot traffic may cause coating to wear away. This does not constitute a warranty claim.
