QCon Pro X - iMap release notes

Device Model: QconPro X
Release date: Aug 5, 2019
iMap Version: V2.22
Who need to upgrade: All users
Upgrade fix/Feature added: Changed all button mapping values to "Note" value

NOTE: *This iMap version uses an auto-sensing function to select the appropriate firmware for your device. Your computer must be connected to the internet for this to work. Otherwise, you must update your firmware manually. (When running the iMap offline, you will be prompted to do so). When online, iMap V2.22 will automatically download and install QCon ProX/XS firmware V2.02.*

Update footprint
