LINE STORY— *California Tan® Resto[red]® Collection*

Treat your skin to special care! Resto[red]® is a collection of products to use in conjunction with a Red Light regimen for those looking to improve their skin's appearance and protect it from future damage. Red Light has been shown to support the production of collagen, hyaluronic acid and elastin. Red Light also helps promote skin rejuvenation and decrease the appearance of fine lines and wrinkles. Skincare backed by science, the Restored collection is here to help!

SKINCARE TECHNOLOGY

Pu[red]®Technology: Helps prevent premature aging, oxidative stress and protects skin barrier function by allowing only the purest Red Light to penetrate the skin. Pured Technology also helps protect the skin from over-exposure to Blue Light which can prevent skin aging.

Certified Aloe Vera: Provides potent moisturization benefits and delivers key nutrients, including amino acids, which help to maximize Red Light benefits by providing the skin with Collagen for production, helping maintain your Red Light results until your next session.

Vitamin C: Vitamin C and Red Light separately help to increase collagen production and when used together the effectiveness is enhanced for better results. Vitamin C can also boost skin luminosity.

Argan Oil: Helps provide younger-looking and radiant skin. Argan Oil can be best absorbed after a Red Light session, maximizing results.

Pro-Vitamin B5: Assists in maintaining a healthy skin barrier and improving skin moisturization, helping keep skin supple until your next Red Light session.

Hyaluronic Acid: Delivers high levels of hydration while maintaining skin's natural balance. It is known to increase the effectiveness of Red Light when used before and after.

AVAILABLE SIZES

4oz. Jar

ADDITIONAL INFORMATION
