## BIOGRAPHY

### ÖONA DAHL

Öona Dahl is a visionary producer and DJ whose deep-rooted passion for music has shaped a unique and evolving sonic identity. Her journey began with a childhood fascination for sound, experimenting with cassette tapes before delving into music production using Acid Pro and Fruity Loops. Immersed in Toronto's vibrant rave scene, she quickly transitioned to DJing in clubs by the early age of 17, setting the foundation for a career defined by artistic innovation.

After studying sound design in Florida, Öona became a key figure in the underground electronic music scene, forging connections with industry pioneers such as DJ Monk (Rabbit In The Moon) and DJ Three (Second Hand Satellites) of the influential 90's label Hallucination Recordings label. Her ability to transcend musical boundaries has led to performances on some of the world's most revered stages like Boom Festival, Tomorrowland, EDC and Ultra Music Festival. With clubs like Watergate or Katerblau in Berlin, to Elsewhere and Signal in NYC, Club Space Miami and Factory Town where she continuously challenges expectations and reinvents her sound.

As a producer, Öona has built an impressive discography, with underground house and techno releases on esteemed labels like Watergate and DJ Three's Hallucienda imprint. Her critically acclaimed artist albums, Holograma and Morph, showcase a broad spectrum of sound—from leftfield house to ambient pop—earning praise from respected music critics such as Joe Muggs (The Wire), Terry Matthew (5 Magazine), and Bruce Tantom (DJ Mag).

Her recent work continues to push creative boundaries, with club-driven productions spanning genres. Notable remixes include Kadosh's Concealing on Nervous Records, Burn Like Fire for electro artist xxlsisxx, and Wrong Note by Moon Boots featuring Ora The Molecule. She has also collaborated with West Coast house legend Doc Martin on Soul On Fire (Selador Records) and reimagined Mila Stern's Five Finger Discount for Kiosk ID.

Always evolving, Öona's upcoming projects explore new territories and psychedelic textures, beginning with her next EP on Watergate Records, Key of Sun. Her third studio album is slated for release in Winter 2025 where she debut a psybient-vocal electronica live show this summer at Denver's Psychedelic Science (Portal Dome) and Meow Wolf. This Fall, she will unveil a new live AV show focused on her underground house and techno productions, accompanied by a tour. With more original productions on the horizon, she continues to push her artistry forward as she moves deeper into 2025.
