## BIOGRAPHY

Godtripper is a chromatic entity fusing myth, machine, and music into ritualistic live techno. Known for high-intensity sets and a psychedelic sonic signature, they create immersive dancefloor experiences designed for altered states. Launching Psyonik Records this June, their debut EP *Exist* sets the tone for a raw, perception-warping sound.

With standout performances at Factory93, The Caverns, and Radius, Godtripper is a rising force reshaping the future of underground techno.
