

Video Splitter Cable

HDMI Male / HDMI Female / HDMI Female

Easily distributes a single signal between two displays.

The MANHATTAN™ Video Splitter Cable establishes a fast and convenient connection to simultaneously transmit a signal between a desktop or notebook computer and two displays. Unlike common Y-cable configurations found on other video splitter cables, the MANHATTAN Video Splitter Cable features an integrated 2-in-1 output design in a durable overmold that eliminates unnecessary tangles and clutter to help keep installations and workspaces neat and orderly. A single cable solution requiring no external power supplies or complicated configuration, it's ideal for presentations, retail displays, trade events, training and other applications. Gold-plated contacts and full shielding help MANHATTAN Video Splitter Cables provide clear and stable video transmissions. Convenient thumbscrews, flexible jacket and molded PVC boots with strain relief help ensure connections remain uninterrupted and steady.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.
