Easily distribute a single VGA signal to multiple displays.

The Manhattan Professional Video Splitter with built-in booster streams a single VGA signal from a personal computer or other VGA-equipped source to up to four displays. Ideal for trade shows, classrooms, video conferencing and presentations and retail applications, the Manhattan Professional Video Splitter is a good choice for splitting and distributing a signal to multiple displays when source equipment is remotely stored in a secured room or cabinet. Cascade multiple units up to three levels to output VGA signals to additional displays in widely distributed applications. The gold-plated contacts and fully shielded metal case ensure reliable signal transmission with less degradation.

Features:

- Duplicates a single VGA signal for up to four VGA outputs
- Supports VGA bandwidths up to 350 MHz and resolutions up to 1920 x 1680 with effective transmission distance up to 65 m (210 ft.)
- Delivers a clear, sharp signal from a PC to VGA, SVGA and MultiSync displays, projectors and more
- Cascade up to three levels to expand signal distribution to more displays
- Automatic power save helps conserve power until VGA signal is restored
- Easy to install: requires no configuration
- Three-Year Warranty
