Privacy Filter
Fits Most Screens Up To 19"

Now you see it. Now they don't.

MANHATTAN® Privacy Filters can help keep sensitive information displayed on desktop monitors and notebook computers from the sight of others nearby. Its specially designed surface narrows the field of view to approximately 45° from the display center to effectively discourage glances from curious onlookers or prevent disclosure to information thieves. By restricting visibility to only persons with direct and intentional contact, MANHATTAN Privacy Filters help meet privacy needs and regulations affecting medical, governmental, corporate, financial and personal records access in mobile workspaces, libraries, and educational and other open, public settings. In addition to providing security, MANHATTAN Privacy Filters can decrease eyestrain, glare and annoying reflections caused by fluorescent lighting and sunlight in brightly lit office buildings and cafés, outdoors and near windows without distorted or obscured images.

Easy to Install
The frameless design easily attaches with the included mounting kit to most desktop displays and notebook computers. Once installed, it helps protect fragile LCD surfaces from scratches and minor damage, and remains securely in place when notebook computers are closed for transport and confidential use almost anywherel.

Lifetime Warranty
Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

Model
422895

Features

- Improves privacy when working with confidential information in open environments
