EAN-13: 0766623152334 | UPC: 766623152334

Easily connect a monitor, HD projector or another DVI device to notebook or desktop computers.

Improved Productivity and Versatility.

The Manhattan Hi-Speed USB 2.0 to DVI Converter increases productivity, improves "desktop" arrangements and extends the visual work area across dual monitors. It makes word processing, editing and multi-tasking more effective with less overlapped windows, fewer hidden palettes and better-organized views. Read e-mail on one monitor and open attachments on the other. Expand and view large, complicated spreadsheets without scrolling. Make presentations more compelling with one display for attendees and one for the speaker to view notes.

Easy to Install.

The convenient Hi-Speed USB connection eliminates the need to install another graphics card or struggle with compatibility issues. It's an ideal, portable solution for notebook computers, Ultrabooks and desktop systems with graphics cards that lack additional outputs. With Plug-and-Play and hot-swap capabilities, it's easily installed on any Windows or Mac computer without having to use an external power supply.
