The First On-The-Go, All-In-One Lightning[®] Wall Charger with Retractable Cord

Frustrated with pulling tangled cords from your bag when you're on the go? Tired of seeing cord clutter all over your counter? You need a compact and convenient fast charger that gives you the cable and power you need with none of the hassles of multiple chargers and loose cables. Enter the Manhattan Retracting Lightning Cable Wall Charger. When plugged into a power outlet, it gets power to your iPhone, iPod or iPad fast, supplying it at a current up to 2.1 A. The charger lets you adjust the distance your connected device needs from the charger with a smooth, flat 31" power cable. You extend the cable from its protective case using its plug and it locks into place. When you need to pack up, a simple touch of the release button sends it quickly back into its case. The charger offers a recessed slot with clips that lock the plug into place to protect it when it's not in use. Its smooth, durable ABS housing helps protect this wall charger's internal components. You don't have to worry that the cable and plug are getting abuse once you've put it into your bag, backpack, pocket or purse. You're on the go in no time and can fast-charge your Lightning-compatible device, should you need to.

You'll find this sleek and attractive all-in-one wall charger is a great replacement to all your old chargers and cords. It lets you safely charge your device in any power outlet you can plug into — at the airport, in a hotel lobby or room, restaurant, bar — nearly anywhere.

Wall Charger Delivering up to 2.1 A

Quick delivery of power is what the world of charging is all about, and the Manhattan Retracting Lightning Cable Wall Charger delivers. With one Lightning-equipped device connected to it, your device gets power up to 2.1 amps. If you need to charge a second device, this USB wall charger offers a USB-A port you can plug into at the bottom of this charger. As long as one of your cable's plugs is USB-A, it can be charged. Two devices get up to 1 A each.

Lightning Connector

Your iPad, iPod, iPhone is well acquainted with this wall charger. Since they use the reversible Lightning plug, they get the perfect, snug connection to power that you expect. You're not defined by just this connector. If you have another USB device, you can quickly plug it into the USB-A port on the bottom of this USB wall charger.

With the Manhattan Lightning wall charger, you get a safe, efficient charge every time.

When our device batteries are running low, few things are more welcoming than a place to plug in and charge them up — even if it's a public charging station in an airport the seatback in front of you on the plane, in conference centers, restaurants, etc. But this is a gamble you shouldn't take since connecting your phone to an unknown port has its risks. The compact Manhattan Retracting Lightning Cable Wall Charger cable helps you avoid any likelihood of that happening. It's small enough to carry, and once it's connected to a power outlet, power is flowing and your data is safe.

Features:

- Self-containing two-device Lightning wall charger for people on the go
